Career Objective

Motivated Computer Science undergraduate with skills in Python, Java, SQL, and Machine Learning, supported by hands-on experience through a Machine Learning internship and academic projects. Seeking an entry-level Data Science role to apply my technical and analytical skills in building data-driven solutions.

Experience

Machine Learning Intern, VCODEZ [🔗]

July 2025 – Oct 2025

- Developed and evaluated machine learning models using Python, Scikit-learn, Pandas, and NumPy by performing data preprocessing, exploratory data analysis (EDA), feature engineering, and model training.
- Improved model performance through hyperparameter tuning, cross-validation, and performance evaluation, delivering accurate predictive insights for real-world datasets.

Technical Skills

Languages: Java, Python, SQL

Databases: MySQL, MongoDB

Frameworks & Technologies: RESTful APIs

Visualization and BI: Power BI, Matplotlib, Seaborn

Version Control: Git, GitHub

Projects

A Scalable Machine Learning Model for Dengue Outbreak Prediction and Risk Assessment [🔗]

Tech Stack: Python, XGBoost, Random Forest, Scikit-learn, Pandas, NumPy, GIS, Matplotlib, Jupyter Notebook

- Developed a machine learning-based dengue outbreak prediction system by integrating environmental, climatic, and historical datasets with GIS to identify high-risk regions.
- Built and optimized XGBoost and Random Forest models through data preprocessing, feature engineering, hyperparameter tuning, and model evaluation, improving predictive performance for early outbreak detection.

An Integrated Hybrid Approach for Proactive Network Defence and Webpage Blocking [🔗]

Tech Stack: Python, CNN, XGBoost, SDN, Scikit-learn, Pandas, NumPy

- Developed a hybrid intrusion detection system for Software-Defined Networks (SDN) using CNN and XGBoost to detect and classify network attacks, enabling proactive threat detection and adaptive webpage blocking.
- Implemented data preprocessing, feature extraction, anomaly classification, and adaptive mitigation, achieving 97.7% attack detection accuracy while reducing processing latency for real-time network security.

ADHD Detection in ASD Children using Handwriting Analysis [🔗]

Tech Stack: Python, TensorFlow, Keras, ResNet50V2, CNN, OpenCV, NumPy, Matplotlib, Streamlit

- Developed a deep learning-based handwriting analysis system using ResNet50V2 and a custom CNN to classify handwriting samples into ADHD, ASD, and Control, supporting early and non-invasive diagnosis.
- Implemented image preprocessing, transfer learning, feature extraction, and multi-class classification, and built an interactive Streamlit interface for real-time handwriting image prediction.

Certifications

- Java Developer Certification [🔗]

- Introduction to Python [🔗]

- Cybersecurity Fundamentals [🔗]

- UiPath Automation Developer Associate Training [🔗]

- Oracle Cloud Infrastructure 2025 Certified Foundations Associate [🔗]

Education

B.E. in Computer Science and Engineering, Panimalar Engineering College

2022 – 2026

CGPA: 8.12/10

Higher Secondary (Class XII), Infant Jesus Matric. Hr. Sec. School

2021 – 2022

Percentage: 85%

Secondary (Class X), Infant Jesus Matric. Hr. Sec. School

2019 – 2020

Percentage: 96.6%
