Career Objective

Computer Science undergraduate with hands-on experience in Data Analytics and Machine Learning, skilled in Python, SQL, Power BI, and Excel. Experienced in data cleaning, exploratory data analysis, data visualization, feature engineering, and predictive modeling through academic and industry-oriented projects. Strong interest in applying data-driven approaches and machine learning techniques to solve real-world problems and generate actionable insights.

Technical Skills

Programming: Python (OOP, Exception Handling, File Handling), SQL

Data Analysis: Pandas, NumPy, Data Cleaning, Exploratory Data Analysis (EDA)

Machine Learning: Regression, Classification, Decision Trees, Random Forest, SVM, K-Means, XGBoost

Data Visualization: Power BI, Matplotlib, Seaborn

Databases: MySQL (Joins, Subqueries, Aggregate Functions, CTEs, Window Functions, Stored Procedures, Triggers)

Excel: Pivot Tables, XLOOKUP, VLOOKUP, Conditional Formatting

Tools: Git, GitHub

Experience

Machine Learning Intern, VCODEZ

July 2025 – Oct 2025

- Performed data preprocessing, data cleaning, exploratory data analysis (EDA), and feature engineering using Python, Pandas, and NumPy to prepare datasets for machine learning.
- Developed and evaluated machine learning models using Scikit-learn, including classification and regression algorithms, with hyperparameter tuning, cross-validation, and performance evaluation to improve model accuracy.

Projects

Dengue Outbreak Prediction and Risk Assessment

Tech Stack: Python, XGBoost, Random Forest, Scikit-learn, Pandas, NumPy, GIS, Matplotlib, Jupyter Notebook

- Developed a GIS-based dengue prediction model using climatic, environmental, and historical data to identify high-risk areas.
- Optimized XGBoost and Random Forest models through feature engineering and hyperparameter tuning for outbreak prediction.

Network Defence and Web Page Blocking using Machine Learning

Tech Stack: Python, CNN, XGBoost, SDN, Scikit-learn, Pandas, NumPy

- Developed a hybrid SDN intrusion detection system using CNN and XGBoost to classify network attacks and detect security threats.
- Achieved 97.7% detection accuracy through data preprocessing, feature extraction, and anomaly classification.

Superstore Sales Analysis Dashboard

Tech Stack: Power BI, Power Query, DAX, Excel

- Analyzed Superstore sales data to uncover revenue and profitability trends across products, customers, regions, and categories, delivering an interactive Power BI dashboard for business performance analysis.
- Applied Power Query and DAX for data transformation, modeling, and analytical measures, enabling evaluation of product performance, regional trends, and discount impact on profitability.

Education

B.E. in Computer Science and Engineering, Panimalar Engineering College

2022 – 2026

CGPA: 8.12/10

Higher Secondary (Class XII), Infant Jesus Matric. Hr. Sec. School

2021 – 2022

Percentage: 85%

Secondary (Class X), Infant Jesus Matric. Hr. Sec. School

2019 – 2020

Percentage: 96.6%

Certifications

- Introduction to Python- Infosys Springboard
- Oracle Cloud Infrastructure 2025 Certified Foundations Associate- Oracle
- SQL- HackerRank
